S/NPS/NS FOR TRUENAT BETA COV

Result

Result: **Positive**

Remarks:

Remarks:

A Positive test for SARS-Corona Virus-2 result indicate:
Detection of E gene target confirmed by RdRp gene detection (Confirmatory of RNA for SARS-COV2) in the patient sample submitted.

Sample Remarks : Note:-

1. Negative results do not exclude 2019-nCoV infection and should not be used as the sole basis for treatment or other patient management decision. Low viral load, presence of inhibitors in the sample and mutations in 2019-ncov can lead to a false negative result.
 2. Test has been performed on ICMR approved kit (Expert SARS COV-2).
- * Kindly ensure that these results are not to be used for any thesis/Presentation/Publication in journal without the prior permission of Director General ICMR and Tuberculosis Laboratory (Room No.8005) Dept. of Microbiology, AIIMS, New Delhi.

Cardiac Consultation Summary

Conducting Doctor:

Dr. Kanupriya Chaturvedi

Echo Details:

Situs Solitus, Dextrocardia, AV concordance, VA discordance, Large inlet VSD with bidirectional shunt, DORV, Pulmonary Atresia, PDA supplying branch PA's/ MAPCAs present, LSVC present, No RSVC, RPA- 4.6mm(-1.05z), LPA- 3.6mm(-1.96z), Confluent branch PA's, Right aortic arch with mirror image branching pattern, Normal systemic & pulmonary venous connection, No CoA, Good ventricular contractility.

Final Diagnosis:

Situs Solitus, Dextrocardia, Pulmonary Atresia, DORV, Large inlet VSD with bidirectional shunt, PDA supplying branch PA's/ MAPCAs present, LSVC present, No RSVC, Right aortic arch, Good ventricular contractility.

Prescription Notes:

Tonoferrone Drop: 5drops BD ✓

Advice:

Unsuitable for 2 ventricle Repair.
